DETAILED ACTION

Response to Amendment

The applicant's amendment, received 3-13-2006, overcomes the examiner's prior art rejection. Hence claims 1-12, 15-27, 29-35 and 38-46 are allowed.

Claims 13-14, 28 and 36-37 were cancelled.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

- 1. The applicant submitted an extensive IDS after Final which contains many different variants on the location finding of mobile users. Unless the applicant can specifically point out sections from the IDS prior art containing the passages below, the examiner believes allowability is found in the following:
- a. For claims 1 and 16, the section stating "...signal strength values detected by the radio receivers, wherein the weighting function weights the signal strength values associated with the first frequency band higher than the signal strength values associated with the second frequency band..." is novel.
- 2. For claims 27 and 35, the section stating "...computing, for all unique pairs of radio receivers, the sum of the squares of the difference between the signal strength values detected by a pair of radio receivers less the difference between the signal strength values in the RF coverage mans associated with the pair of radio receivers; weighting each of the computed sums based on the lower of the two signal strength values detected by the corresponding pair of radio receivers; combining the weighted

sums to create a differential error surface; and finding the minimum of the differential error surface...." is novel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
